

Michelle Chen

Product Designer · AI Product Design · Accessibility (WCAG 2.1/2.2 AA) · Design Systems · Front-End Development

Tempe, AZ (open to relocation) · 602-607-9725 · themichellechen@gmail.com · themichellechen.com · LinkedIn

SUMMARY

Product Designer with 3+ years building AI-powered products, enterprise web applications, and accessible (WCAG 2.1/2.2 AA) digital experiences for government, research, and enterprise clients. Owns the full arc of a product: user research, rapid prototyping, usability testing, design systems, and front-end implementation shipped alongside engineers. Uses generative AI and LLM-assisted workflows (Claude Code, Cursor) to compress discovery and prototyping cycles. M.S. in User Experience, 4.0 GPA.

EXPERIENCE

UX/UI Designer

Jun 2025 – Present

VisLab, Arizona State University · Research lab building data visualization and AI-enabled tools · Tempe, AZ

- Collaborate with engineers, researchers, and stakeholders to **rapidly prototype and validate AI-enabled digital products**.
- Lead **user research, usability testing, and design iteration** across **5+ enterprise applications**, translating dense technical requirements into intuitive, task-focused workflows through **human-centered design cycles**, validated with users before handoff.
- Design **accessible data visualization platforms** that turn complex environmental datasets into **interactive dashboards**.

UI/UX Designer (Part-time)

Jul 2026 – Present

Ascenzi & Associates LLC · Advanced manufacturing construction consultancy, semiconductor focus · Remote, US

- Lead **end-to-end product design** for the firm's client-facing platform, from discovery through **high-fidelity prototypes** and a **scalable design system** spanning its workforce, process, permitting, and market-entry service lines for semiconductor clients.
- Facilitate design discussions with principals and subject matter experts, translating semiconductor fab construction expertise into validated product concepts, a clear **information architecture**, and content that reads plainly to non-technical buyers.
- Ship the design as **production code in a custom WordPress block theme**, pairing Figma work with **AI-assisted front-end development** so design intent survives from Figma into the shipped build.

UI/UX Designer

Oct 2023 – Sep 2024

M-think Technology · Digital agency serving government, cultural, and enterprise clients · Taiwan

- Designed **responsive websites** for concurrent clients, balancing business goals with usability and **WCAG accessibility standards**.
- Ran **heuristic evaluations** and turned findings into interface improvements that raised task success and cross-page consistency.
- Built visual systems and **reusable UI components** that held brand consistency across every client deliverable.

SELECTED PROJECTS

Pic2Split: AI Receipt-Splitting Web App

2025

AI Product · OCR · Google Gemini API · Design Systems · Shipped

- Designed and shipped the **end-to-end UX/UI** for an AI bill-splitting product built on **OCR receipt parsing and Google Gemini**, cutting the split flow to **under 2 minutes, 2x faster than the leading competitor**, on a design system built to carry future features.
- Positioned it against Splitwise's ongoing-ledger model with **competitive analysis**, scoping a one-shot, no-login flow.

Indigenous Cultural Museums: WCAG 2.1 AA Government Portal

2023 – 2024

Accessibility Engineering · Semantic HTML · CSS · Design Systems

- Led **UX design and front-end implementation** for a government portal serving 30 Indigenous museums, delivering accessible components, **semantic HTML/CSS templates**, and type systems that passed **WCAG 2.1 AA audits with zero failures**.

SKILLS

Tools & Platforms: Figma (components, variants, auto layout), FigJam, Adobe Illustrator, Adobe Photoshop, Claude Code, Cursor, Git/GitHub, Drupal (Twig templating), WordPress (block themes), Bootstrap, Tailwind CSS, Large Language Models (LLMs)

Front-End & Accessibility: Semantic HTML5, CSS3, SASS/SCSS, WCAG 2.1/2.2 AA, ARIA patterns, keyboard navigation, responsive and mobile-first layout, accessibility auditing and remediation, cross-browser QA, design QA, developer handoff

Design & Visual: Design systems, component libraries, design tokens, interaction design, wireframing, rapid prototyping, high-fidelity mockups, end-to-end product design, brand identity, typography, layout, iconography, data visualization

Research & Strategy: Usability testing, heuristic evaluation, user interviews, journey mapping, information architecture, user flows, design thinking, quantitative and qualitative analysis, stakeholder alignment, cross-functional collaboration

EDUCATION

M.S., User Experience / Human-Computer Interaction — Arizona State University · GPA 4.0/4.0

May 2026

B.A., Cultural Heritage Conservation — National Yunlin Univ. of Science & Technology, Taiwan · GPA 3.76/4.0

Feb 2021

AWARDS, LEADERSHIP

Student Adobe Ambassador (ASU, 2025) · 2nd Place, RoseHack (2025) · People's Choice, Endstar Game Maker Spark Challenge (ASU, 2025) · \$10,000 New American University Scholarship (2024) · Toastmasters International member

CERTIFICATIONS

Anthropic AI Fluency Framework & Foundations (2026) · Anthropic Claude 101 (2026) · CITI Program IRB Social & Behavioral Research (2026) · ASU Spark Challenge Skill Badge: UX Design (2025) · freeCodeCamp Responsive Web Design (2022)
